back wask, your knees weak, and have but little appetite, and you attribute this to dyspensia or liver-complaint?

Now, reader, self-abuse, veneral diseases badiy cared, and sexual excesses, are all capable of producing a waskness of the generative organs. The organs of generation, when in perfect health, make the man. Did you ever think that those hold, defant, energetic, perserving, successful busin-as-men are always those whose generative organs are in perfect health? You never hear such men complain of being melanchely, of nervousness, of papitation of the heart. They are never afraid they cannot succeed in business; they don't become sad and discouraged; they are always polits and pissent in the company of indice, and look them right in the face—none of your dewneast looks or any other meanness about them. I do not mean those who keep the organs inflammed by a uning to excess. These will not only ruin their constitution, but also those they do business with or for.

How many men from badly cared diseases, from the effects of self-abuse and excesses, have brought about that state of weakness in those organs that has reduced the general systems on much acto induce almost every other disease—idioxy, lunsary, paralysis spinal affections, suicide, and almost every other form of disease which humanity is helt to, and the real cause of the trouble scarcely ever suspected, and have doctored for all but the right one.

Diseases of these organs require the use of a diuratic. HLMBOLD'S FUUD EXTRACT BUCHU is the great Diuretie, and is a cartain care for diseases of the Budder, Kidoses, Gravel, Drossey.
